

API KEYPAD

The New Face In Access Control

Combining four decades of keypad innovation with advanced Bluetooth technology, the AP1 keypad is designed to elevate both operator and tenant experiences. With a larger OLED display, support for automatic firmware updates, and an optional heated keypad, the AP1 represents a major advancement for operators seeking to boost security and streamline automation.

BLUETOOTH CONNECTIVITY

Tenant access controlled through a next generation Bluetooth connection actuated via PTI's StorID smart device mobile app.

LARGE OLED DISPLAY

Features a larger, high-resolution screen that utilizes icons and clear messaging to provide intuitive instructions for tenants.

SMART CLAMSHELL CHASSIS

Hinged form factor allows for one handed maintenance possibilities without the chance of losing a captive screw while servicing.

OPTIONAL HEATED KEYPAD

For colder climates, the heated keypad increases operating temperature ranges and mitigates the freezing of buttons.

Unleash the power of reliability with the AP1 keypad, crafted to thrive in extreme conditions. Building on the successes of its predecessors, the AP1 integrates enhanced surge protection and a user-friendly clamshell design, ensuring durability and ease of maintenance. Each facet of the AP1 has been scrutinized to deliver unparalleled performance for owners, operators, and tenants alike.

LEVEL UP YOUR TENANT EXPERIENCE WITH **STORID**

Designed to create a seamless storage experience for tenants, StorID provides them with the ability to open gates, doors, and view access activity from their mobile device. With StorID, there's no getting out of the car at the gate, no keys to lose, and no more access codes to remember. Access is as simple as opening up the app and swiping the screen while still inside your vehicle to open the gate making property entrances completely touchless and contactless.
