ACCESS CONTROL SOLUTIONS

PTI SECURITY SYSTEMS
### ASSA ABLOY

ACCESS CONTROL

A crucial component of a comprehensive self-storage security plan is the access control system. This system seamlessly integrates with your property management system to ensure that only paying tenants can enter the premises and access their storage units. PTI Security Systems™ presents a cutting-edge system that blends state-of-the-art cloud-based software with exceptionally durable and advanced hardware components, delivering a user-friendly experience for tenants while maintaining the utmost security for your facility.

The pairing of controllers with StorLogix Cloud provides the foundation for your facility's access control and site security. With features that range from basic to advanced and flexible programming capabilities, you can configure a solution that is perfect for your site.

STORLOGIX CLOUD

Award-Winning Access Control Software

With StorLogix Cloud, operators can maintain complete visibility and control over their entire portfolio from anywhere in the world. A cloud-based access control software eliminates the need to be on-site in order to view activity history, provide and restrict access to tenants, or pull detailed reports, enhancing overall operational efficiency.

Customized Notifications

Real-time customized notification tools allow for an immediate response to the security events most important to your business.

Multi-Site Management

Improve visibility and insights with events and data from an entire portfolio, region, or a single site, all from one centralized login.

Device Health at-a-Glance

Troubleshoot with ease and quickly resolve issues with a streamlined dashboard interface that identifies the root of any security incident.

CLOUD MIGRATION

Migrating to the Cloud has never been easier. Depending on the hardware already owned, there are one of three paths operators can take to fully enjoy the benefits of being in the cloud. Streamline your operations while securely improving your bottom line from the comfort of the cloud.

Providing tenants with the convenience of a mobile app to access their facilities has become a standard for leading self-storage operators. PTI offers both a tenant-facing and an operator-facing mobile apps.

EASYCODE

Tenant Facing Access Control

The EasyCode mobile app provides tenants with convenient access to their facilities. EasyCode empowers tenants to open gates, doors, and monitor access activity directly from their mobile devices. The app eliminates the need to exit the car at the gate, lose keys, or remember access codes.

Notable features include 1-click gate, door, and elevator entry, 1-click access to the renter's access code, an improved renter sign-up process, and full integration with PTI keypads, door alarms, and DoorBoss. Multi-unit, multi-facility renters can utilize a single account to access and store all their relevant data including a detailed tenant activity log, tracking entry and exit times.

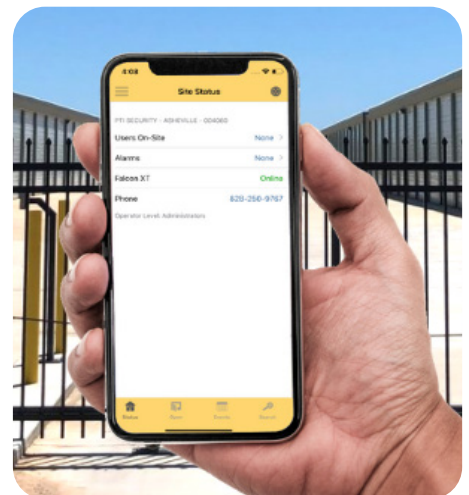

STORLOGIX MOBILE

Operator Facing Access Control

The StorLogix Mobile app places the power of your access control system at your fingertips. Offering real-time site management capabilities, StorLogix Mobile enables operators to remotely trigger or hold any access points, delivering a more seamless experience for tenants.

Key features include the ability to open doors or gates from anywhere, customizable notifications for regarding unusual on-site activity, constant visibility of on-site tenants, and the capability to suspend a tenant's status with a simple click. Operators can conveniently review current or historical site activity by tenant or unit. StorLogix Mobile empowers operators to efficiently manage access control, providing unparalleled flexibility and convenience for site security management.
