

CLOUDCONTROLLER

Cloud-Based Access Control

Future-proof any facility while increasing its automation potential by moving to forward-thinking, cloud-based, access control.

The latest CloudController by PTI Security Systems combines expanded integration flexibility with enhanced operational continuity. With full Wiegand reader support, simultaneous onboard I/O operation, and Enhanced Offline Mode, facilities can stay productive even during internet outages. When paired with StorLogix Cloud, operators gain complete control and real-time visibility from anywhere.

Comprehensive Input Support

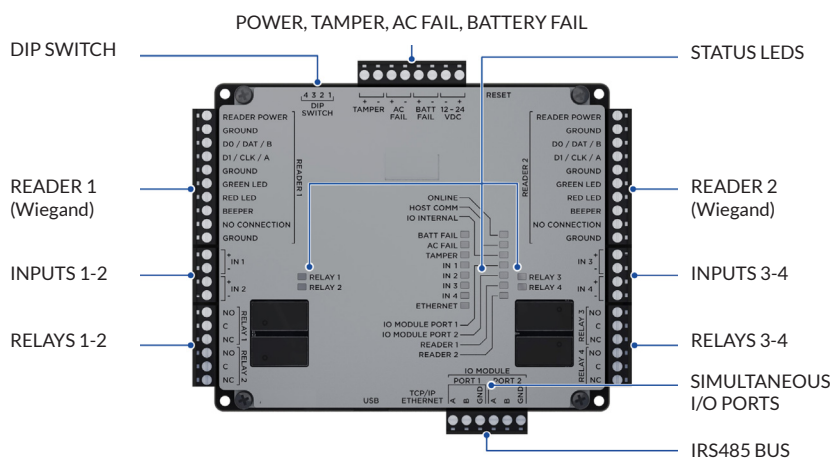

Multiple inputs support a variety of devices, including:

- Door alarm switches
- Request-to-exit (REX) devices
- Motion sensors & photo beams
- Proxy card readers & pressure pads
- Other dry-contact inputs

Versatile Output Control

Four onboard output relays provide control for:

- Gate operators
- Doors & entry points
- Sirens & alarm systems
- Lighting systems & elevator controls
- Virtual relays

CLOUDCONTROLLER FEATURES

Cloud Native
Cloud-Based Software
Automatic Firmware Updates
Enhanced Offline Mode
Webhooks
SMS/Email/Push Notifications
Reader Support for Wiegand Devices
Simultaneous I/O Port Operation
Browser Notifications
Aggregated Dashboard
Integrates With Unit Security Devices
Integrates with Mobile Solutions
Enables Bluetooth Functionality

Access control is driving the majority of infrastructure conversations with operators.
