

API+ KEYPAD

See More, Hear More, Control More

Building on the innovation of the original AP1, PTI Security Systems pushes the boundaries of automation and security with the new AP1+ Smart Keypad. Designed to enhance both security and convenience, the AP1+ leverages the power of Bluetooth connectivity while adding integrated video and intercom features. These advancements not only improve the tenant experience but also expand automation capabilities for facility operators.

BLUETOOTH CONNECTIVITY

Increase overall security by leveraging Bluetooth property access and the STORID mobile app.

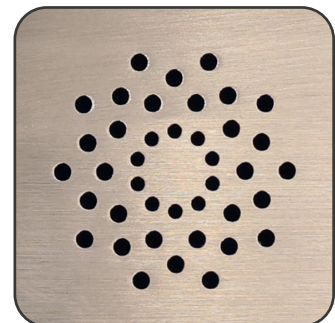

2MP DIGITAL CAMERA WITH INFRARED LIGHTS

Once connected to your CCTV, see videos with unprecedented clarity, even in low light, for tenants who are accessing, or have accessed, the property.

SMART CLAMSHELL CHASSIS

Easily access internals like never before with a reimagined and more robust clamshell design.

ZOOM MIC WITH HIGH OUTPUT SPEAKER

Crystal clear & audible communication for on demand conversations between tenant & operator over an established SIP account.

Featuring a more rugged form factor designed for durability and easy serviceability, the AP1+ was designed to immediately replace the successful PTI APEX KEYPAD or any other keypad that leverages RS485 communication.

API+ SPECIFICATIONS*

	Display	• Larger, OLED display • Number of lines supported: 4
	Chassis	• Heavy gauge, stainless and stamped steel clamshell design • Measurements: 4.8"(l) x 7.6" (h) x 2.9" (w)
