

EASYCODE & STORID

COMPARISON

Providing tenants with the convenience of a mobile app to access their facilities has become a standard for leading self-storage operators. The new tenant-facing StorID mobile app from PTI Security Systems represents a significant shift in the self-storage industry towards modern solutions aimed at enhancing the tenant experience. It utilizes the latest technology to provide greater speed and scalability, and seamlessly integrates with PTI's range of access control and security solutions. By adopting StorID, operators empower their tenants to open gates, doors, and storage units, as well as view their access history—all from their mobile device.
